A revolutionary non-surgical  
body contouring treatment that eliminates fat

Show off  
the body  
you've always  
dreamed of.

PROVEN TECHNOLOGY. **LIFE CHANGING RESULTS.**

CoolSculpting® is a revolutionary non-surgical contouring treatment that freezes fat, which then is naturally eliminated from your body. No needles, no special diet, no supplements, no surgery. And most importantly, no downtime. It's safe, medically cleared, and effective.

**Undeniable results in  
as little as one treatment**

## THE INSPIRATION BEHIND THE INNOVATION.

»»»»» It all began with not-so-chubby cheeks.

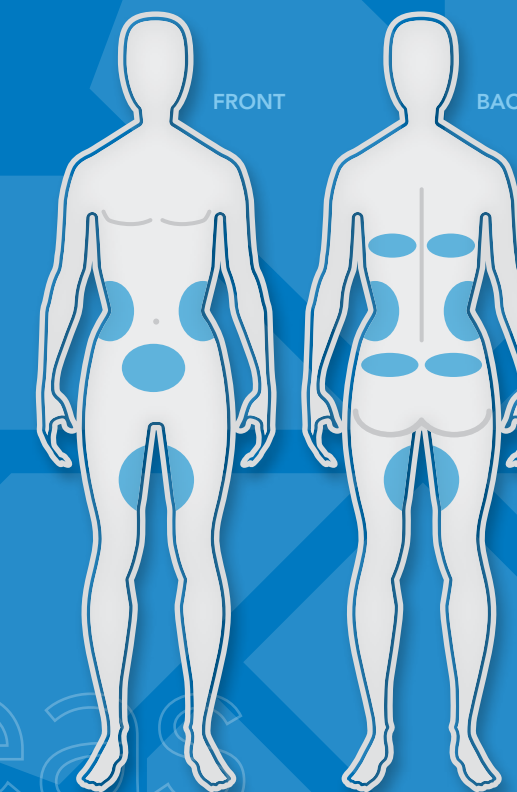

Developed by renowned Harvard University scientists, Dieter Manstein, MD, Ph D, and R. Rox Anderson, MD, CoolSculpting® technology was born of the observation that some children got dimples due to eating popsicles. The idea that cold can selectively affect fat cells was the insight behind Cryolipolysis, the proven science on which CoolSculpting is based.

## COOLSCULPTING ELIMINATES STUBBORN FAT IN YOUR **PROBLEM AREAS**.

WHERE WOULD YOU LIKE TO CHANGE YOUR BODY?

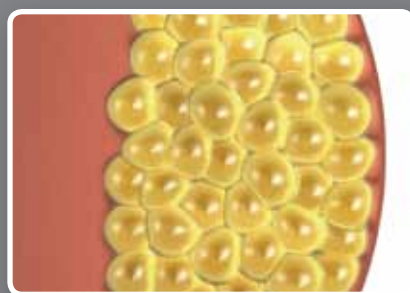

- » Flanks
- » Stomach
- » Upper back
- » Lower back
- » Inner thighs
- » Chest – male only

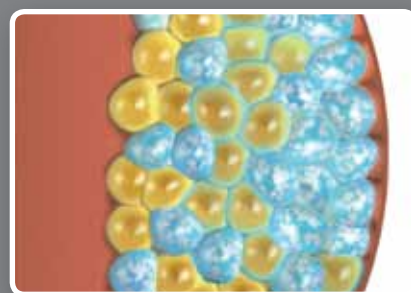

## HOW COOLSCULPTING WORKS:

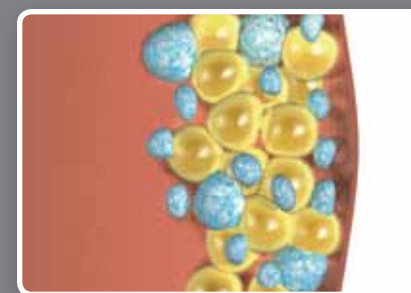

Many of us have bulges of stubborn fat.

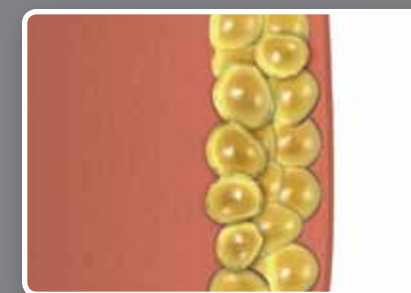

Those unwanted bulges contain fat cells which can be resistant to diet and exercise.

CoolSculpting uses controlled cooling to target and crystallize fat cells.

Crystallized fat cells gradually die off, then are naturally eliminated from your body.

In the weeks and months following treatment, remaining fat cells condense, reducing the fat layer.

CoolSculpting lets you say goodbye to stubborn fat.
